Mario Alberto Ramírez Martínez

Software Developer · Backend & IoT Systems

Queretaro, Mexico | rmmarioalberto08@gmail.com | 442 637 2861 | rmMarioAlberto | LinkedIn | Portfolio

Profile

Backend and IoT-focused developer completing a Software Development and Management Engineering degree at UTEQ (expected Apr 2027), with experience delivering client applications and developing software connected to devices.

Education

Universidad Tecnológica de Querétaro (UTEQ) Sep 2023 – Apr 2027

Engineering in Software Development and Management

- Expected graduation: Apr 2027 · GPA: 9.54/10.0
- TSU in IT · Cross-Platform Software Development (2021–2023)

Fraunhofer IIS, Nuremberg, Germany Sep 2026 – Dec 2026

Academic exchange MIOTY networks and low-power endpoint design

- Hands-on MIOTY LPWAN and low-power PCB design with KiCad

Experience

Querétaro Energy Cluster (CEQ) · services via Linkore Solutions May 2026 – Present

Technical Lead · Full-Stack (contract)

- Led a four-person team and built frontend/backend modules for a VPS-deployed B2B marketplace.
- Agreed scope with the client and coordinated delivery and GitHub quality controls.

Fitness Gym Jan 2026 – Jun 2026

Full-Stack Developer (freelance)

- Put a serverless system for memberships, QR access, inventory, and reports into production for a 150+ member gym.

Yex Acoustics · Imox Cloud Dec 2025 – Apr 2026

Backend Developer (freelance)

- Deployed NestJS, MQTT, and Redis on a resource-constrained physical server for 50+ concurrent devices at 1.5-second intervals.
- Reduced false disconnect alerts through timestamp validation; implemented OTA and Redis caching.

Atlas Copco Mexicana, S.A. de C.V. Mar 2025 – Mar 2026

Database & Power Platform Intern

- Digitized maintenance reports with 30-minute manual approvals across 10+ daily operations.
- Built Node.js services to synchronize encrypted data between Power Platform and legacy systems.

Projects

GeoCESAR · Rural Emergency Response

Personal project in development · Java, Spring Boot, React, React Native, MIOTY, PostGIS

- Rural emergency-response platform designed to connect requests for help with response teams, share people's locations, and support follow-up on each incident.

Leadership & Activities

IEEE Student Branch · UTEQ 2026 – Present

Member

- Driving the organization of UTEQ's first university-wide hackathon; event planning is ongoing.

Skills

Backend: TypeScript, Node.js, NestJS, Java, Spring Boot

IoT & Connectivity: MIOTY, MQTT, ESP32, OTA

Data, Delivery & Frontend: PostgreSQL, PostGIS, Redis, Docker, GitHub Actions, React, React Native, Angular

Certifications

ISO/IEC 27001 Professional Certification – Information Security Apr 2026

Languages

Languages: Spanish native · English B2 (technical reading) · German A1
